cGMP biomanufacturing professional with nearly 6 years of experience across GMP operations, process development, and project execution. Known for leading cross-functional workstreams, building scalable training and execution systems, strengthening QMS workflows, and reducing operational risk.

## PROFESSIONAL EXPERIENCE

Biomedical Specialist, Cedars-Sinai Biomanufacturing Center, Dec 2022 - Present West Hollywood, CA

- Lead cGMP training program for 20 interns and 60+ employees by coordinating the trainer pool and producing self-paced training videos that reduce training time and improve retention.
- Modernize employee gowning and aseptic technique qualifications from paper records to InstantGMP to improve efficiency, visibility, traceability, and compliance.
- Serve as a co-lead for four iPSC-based programs, owning execution visibility by building and maintaining project operating systems (Smartsheet task/readiness tracking, timelines, integrated calendars) along with meeting minutes used daily for team alignment, cross-project scheduling, and management reporting.
- Represent Manufacturing in cross-functional quality investigations, contributing to record review, root-cause analysis, investigation drafting, and product-impact assessment.
- Identify and mitigate real-time execution risks involving documentation discrepancies, data integrity, and manufacturing readiness to reduce rework and protect data quality.
- Author and route master production records, SOPs, and material specifications per cGMP/FDA expectations. Review and approve executed batch records with a cross-functional team.
- Build scalable systems and standardize tools/templates (documentation, labels, trackers, calculations) to reduce variability and strengthen documentation consistency.

PD Senior Research Associate, Scorpion Biological Services, January 2022-Dec 2022 San Antonio, TX

- Spearheaded the startup's EHS program as the sole owner by training employees, closing compliance gaps, and authoring SOPs to align with OSHA requirements.
- Executed DOE studies using Ambr bioreactors, analyzing outputs to optimize process conditions and support scale-up decisions.
- Supported preclinical and clinical process development and scale-up across 2D/3D mammalian cell culture and mAb programs.
- Collaborated with cross-functional teams and clients to troubleshoot, present results, and drive next-step decisions.

Associate Scientist - Operations, GenCure, October 2020-January 2022 San Antonio, TX

- Owned all GMP equipment calibration, maintenance, and performance qualifications (vendor or in-house) on various schedules. Reviewed and approved calibration documents prior to archival with QA in MasterControl.
- Cleanroom GMP operator for pre-clinical and clinical biopharmaceutical manufacturing events up to 80L.
- Trained/qualified 20+ employees on core competencies (gowning, BSC disinfection, material transfer, aseptic technique) and supported recurring qualification cadence.
- Executed a cleanroom EM procedure for 128 different locations on a weekly and biweekly basis and assisted in cleaning cGMP cleanrooms on defined schedules.

## TECHNICAL SKILLS

- Systems / Tools: Excel, PowerPoint, Word, SharePoint/OneDrive, Smartsheet, Adobe Acrobat, MasterControl, InstantGMP, LabArchives, SciNote
- Project Management: dashboards, project scheduling, timeline/dependency management, meeting minutes, action logs, resource coordination, training deployment, process improvement
- Quality & Documentation: SOP/MPR, batch record review, material specifications, deviation/CAPA, change controls, risk assessments, quality investigations, root cause analysis
- Cell Culture: iPSCs, MSCs, mAb, 2D adherent, 3D suspension, cell counting (NC-200/202, MoxiGO II, hemocytometer, Cellometer)

## EDUCATION

University of Pittsburgh Pittsburgh, PA  
Bachelor of Science, Biological Sciences Minors: Chemistry, Exercise Science August 2020

## AWARDS

Employee of the Month, Aspire Award, Train the Trainer (T3) Program
